PROCEEDINGS.

Dated 16*th December* 1888.

No. 6142-7.
892-7.

Granting permission to raiyats to establish irrigation by lift along the lands on the upper side of certain River Channels, subject to certain rules.

Mysore Government Central Press, Bangalore.—22-1-89.—80.

Proceedings of the Dewan to His Highness the Maharaja of Mysore, (Public Works Department),—dated 15th December 1888.

No. 6142-7—892-7, dated Bangaloke, 15th December 1888.

Order.—In view to utilize the supply in the large river channels in Mysore, to the fullest possible extent, it has been proposed that the raiyats should be allowed to establish irrigation, by lift, along the lands on the upper side of such channels; and as the measure will doubtless prove very beneficial to the State and to raiyats, the Government have decided to try the experiment on the marginally noted channels, subject to the following rules:—

1.	Kattepur	Ashtagram Channel Division.
2.	Ramanathpur	
3.	Ramasamudram	
4.	Tippur	
5.	Devaraya	
6.	Rampur	
7.	Mandigere	Mysore Division.
8.	Chikkadevarayasagar ...	
9.	Mahadevamantri	
10.	Sriramadevar, South ...	Hassan Division.
11.	Do North ...	

(1) As the lands below the channels have the prior claim to the supply, the cultivation on the upper side must not be extended so as to affect materially the irrigation at the tail of the channel. At the outset therefore, the area to be so cultivated should be restricted to 300 acres above each of the first 5 miles.

(2) The lift which will be limited at first to 6 feet above H. W. M. of channel, shall not be placed within 30 feet of the channel edge.

(3) Such cultivation should begin not later than the 30th June; but it should be earlier, if the early rains allow of the ground being prepared for cultivation. The rains should be taken the fullest advantage of. Whether the raiyat has used sufficient deligence in this matter, will be decided with reference to the condition of the dry cultivation on neighbouring dry fields.

(4) Land for which water is thus supplied, will be charged with a moderate water rate, and the Superintendent of Revenue Survey will be requested to report, after consultation with the Deputy Commissioners concerned, the rate he would recommend for adoption. The rate should be temporary for the first two years, when it may be possible to form a proper opinion on the success of the measure.

To

The Chief Secretary to the
Govt of Mysore
Bangalore

Sir

With reference to Government Proceedings No 6142-7 / 892-7 dated 15th December 888, and Govt's reply on Subject no 311, in the Proceedings book of the Dasara Assembly of October 891, I have the honor to submit herewith for orders, an application from one Venkatakrishnappa, of Pallalli, Sreenivasapura Kolar Taluk, asking permission to use water from Devaraya Kala, for his mango plantation.

2. The plantation is 24-22 in extent and is situated in the 9th mile of the Devaraya Kala. The applicant proposes to take water to his plantation by means of a Pemph

Pemp.

3. The Executive Engineer French Rocks in has no objection to the use of the water when there is full supply in the nala, and he says that the applicant cannot claim water always as a matter of right.

4. The Sub Division officer French Rocks recommends that applicant may be allowed to use water on payment of a water rate of one rupee per acre. I think it may be allowed, though the lands are not within the first five miles, and that the rate of one rupee per acre is fair, as the cost of lifting water is likely to be heavy, and as much water will not be required for garden cultivation (viz mangoe). It must however be distinctly understood, that the supply may be interrupted in Exceptional Seasons, when the interests of the rest lands below require it.

5. The entire Correspondence ending with the French Rocks Sub Division
